

FierceWireless Names VeriWave as one of Its "Fierce 15" Wireless Companies of 2009

VeriWave on Leading Edge of Wireless Technology

PORTLAND, OR – May 28, 2009 – VeriWave announced today that it has been named to the annual FierceWireless "Fierce 15" list, designating it as one of the top wireless companies of the year. FierceWireless editors evaluated hundreds of organizations, and found VeriWave to be amongst the "fiercest," proven by their creativity and innovations in the marketplace.

FierceWireless, an internationally recognized daily email newsletter reaching more than 70,000 senior wireless industry executives, provides executives in over 100 countries with a quick, authoritative briefing on the day's top wireless stories, including new trends and technologies.

"VeriWave's innovative testing solution reduces LAN and WLAN testing from months to days," said Sue Marek, Editor-in-Chief of FierceWireless. The write-up also states, "What makes VeriWave unique is its approach. VeriWave provides the development, integration, pre-sale marketing and support of a testing solution for LAN and wireless LAN networks that reduces test times from months to days. Instead of testing how a network performs using a single device, VeriWave generates hundreds of unique clients that can each run their own applications to provide a view of what real-world stresses on access points in a network would be like."

"By assisting leading wireless network infrastructure manufacturers in developing the most advanced corporate-class Access Points and Controllers, we have become the industry standard for WLAN testing and are now enabling major advances like the 'all-wireless' office," said Eran Karoly, VeriWave's vice president of marketing. "Our systems and methodologies furnish best practices among service providers and IT managers from design and qualification through deployment. Our latest WaveAgent™ technology further advances the delivery of the most advanced WiFi-enabled devices to date such as smart-phones, patient monitors, and wireless printers."

The FierceWireless "Fierce 15" celebrates the spirit of being "fierce" – championing innovation and creativity, even in the face of intense competition. The complete list of winning companies is available on the FierceWireless Web site at <http://www.fiercewireless.com>.
